SYLLABUS

COURSE: Introduction to Neurophilosophy IV
CODICRED: 71530-03
INSTRUCTORS: Professors Nythamar de Oliveira
& Rogel Esteves de Oliveira
CREDITS: 3.0 45 h  YEAR/SEMESTER: 2018/2
Tuesdays at 9 a.m. Room 212 Building 9 (School of Humanities - PUCRS)

COURSE DESCRIPTION:
This course will begin with an introduction to neurophilosophy and social epistemology, before proceeding to explore the most recent contributions to Social Epistemology and Neuroethics. No previous knowledge of neurophilosophy or social epistemology is required. All classes, readings and discussions will be conducted in English.

OBJECTIVES:
An introduction to neurophilosophy and social epistemology, and in-depth discussions on major topics and problems of Social Epistemology and Neuroethics. Reading assignments and translations from two major contributions to this field:

PROGRAMMATIC CONTENTS:
Introduction to Social Epistemology and Neuroethics.

METHODOLOGY:
This class will be run seminar-style. Students will be encouraged to take part in discussions and present papers or serve as commentators. Student presentations will be similar to our workshop and class presentations, in which a mini-paper about the reading may be presented or an original contributing paper. Afterwards, fellow students will comment on the presentation.
GRADING POLICY:

Grades are based on point accumulation throughout the fifteen weeks, comprising class participation (by attending classes, raising questions, sharing students’ views, insights, comments, and criticisms with classmates), quizzes (multiple-choice or truth/false), short essays and/or a research paper.

BASIC BIBLIOGRAPHY:

Secondary Bibliography (Neurophilosophy):
